

Summary

Software Developer with 3+ years of professional experience building and maintaining production SaaS applications, with a strong focus on React.js, TypeScript, Next.js, and scalable frontend architecture. Experienced in developing reusable UI systems, integrating REST APIs, and working with Node.js, FastAPI, PostgreSQL, authentication and authorization, and multi-tenant applications. Hands-on experience with AWS, Docker, GitHub Actions, CI/CD, and AI-powered automation workflows using LLMs.

Skills

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React.js, Next.js, Vite, Tailwind CSS, Redux Toolkit, TanStack Query, React Hook Form, TanStack Table

Backend: Node.js, Express.js, FastAPI, Django, REST APIs

Database & ORM: PostgreSQL, Prisma ORM

Cloud & DevOps: AWS, Docker, Docker Compose, GitHub Actions, Nginx, CI/CD

Architecture & Security: Multi-Tenant SaaS, RBAC, JWT, Authentication & Authorization, RESTful Architecture, Cloud-Native Applications

AI & Automation: LLMs, Claude, Gemini, Prompt Engineering, AI Automation, AI Workflows

Tools: Git, GitHub

Experience

IO DataLabs Pvt Ltd. , Canada

Jan 2023 - Present

Software Developer

Remote

- Built and deployed production SaaS features across React.js, TypeScript, Next.js, Node.js, FastAPI, and PostgreSQL, delivering end-to-end functionality from frontend architecture and API integration through production deployment.
- Built reusable React/TypeScript UI architecture adopted across 3 B2B SaaS products, reducing duplicated frontend implementation and accelerating feature delivery.
- Developed and enhanced REST APIs using FastAPI and Node.js, implementing backend features, integrations, authentication flows, and production debugging.
- Engineered multi-LLM workflows using Claude and Gemini to automate form-generation logic, replacing a manual process estimated at 8+ months of engineering effort.
- Maintained a shared codebase across multiple B2B brands, implementing configurable feature flags and brand-specific functionality to enable different features and workflows while minimizing code duplication.
- Integrated and debugged enterprise workflows involving third-party APIs, webhooks, and bidirectional data synchronization, resolving complex cross-system data and integration issues in production.

- Designed 3D mechanical models and assemblies using Creo and AutoCAD.
- Created 2D engineering drawings and manufacturing documentation.
- Collaborated with production and quality teams on design and engineering requirements.

Key Projects

a. **JMJ Mortgage Platform (Hive) - B2B Mortgage SaaS Platform**

Engineered a Node.js multi-tenant build CLI and dynamic routing architecture that enabled deployment of a shared SaaS codebase across 3 B2B mortgage clients. Built a JSON-driven loan application wizard supporting highly configurable workflows and dynamic form rendering. Developed staff dashboards using TanStack Table and integrated HelloSign e-signature workflows into mortgage application processes.

a. **IO-forms (Enterprise Form Builder)**

Built a high-performance, embeddable form-rendering engine using React.js, Vite, and json-logic-js to generate dynamic, complex user interfaces from JSON schemas.

b. **IO DataLabs Website (io-website)**

The primary corporate landing page featuring interactive 3D elements and dynamic content. Developed a Next.js 16 + Three.js website with Markdown-based content management and SEO- focused architecture.

Personal Project

Phoenix-PM - Cloud Ntive Multi Tenant Project Management SaaS

Tech: React js, Typescript, Node js, Express js, PostgreSQL, Prisma, JWT, Github actions,

- c. Built a multi-tenant project management SaaS with organization-scoped data isolation and role-based access control.
- d. Designed relational PostgreSQL schemas using Prisma ORM for organizations, users, projects, tasks, memberships, and permissions.
- e. Developed RESTful APIs with Node.js, Express.js, Prisma, and JWT, implementing authentication and authorization.
- f. Containerized frontend and backend services with Docker and Docker Compose for consistent development and deployment environments.
- g. Implemented GitHub Actions CI/CD pipelines for automated builds, testing, and AWS deployment.

Education

Vindhya Institute of Technology and Science (RGPV)

Bachelor of Engineering (B.E.) in Mechanical Engineering

2017

Indore, MP
