PROFESSIONAL SUMMARY

Versatile Full Stack Engineer and Architect with a proven track record of building complex enterprise systems from zero to one. Expert in modern React ecosystems (Next.js, Vite, Zustand) and scalable backends (Node.js/Express, Python/FastAPI, Prisma, PostgreSQL). Highly proficient in AI-Augmented Development, leveraging Agentic AI (Claude 3.5, Gemini Pro) to achieve exceptional engineering velocity and ship end-to-end SaaS products and robust internal tools.

KEY ACHIEVEMENTS

- **Zero-to-One Architecture:** Successfully architected and deployed 4 entirely distinct products from scratch (Hive Ecosystem, IO-Forms SaaS, Phoenix-PM, and IO 3D Website) serving as a one-person product and engineering powerhouse.
- **System Integration:** Mastered complex domain-specific architectures by building a bidirectional data sync engine directly integrating with Ellie Mae's Encompass, handling thousands of real-time webhooks.
- **Velocity & Scale:** Achieved 10x output velocity over the last 6 months by pioneering Agentic AI workflows, drastically cutting time-to-market for major features like React 19 migrations and CLI wizards.
- **Major Tech Migrations:** Led the zero-downtime migration of the entire frontend ecosystem to React 19 and React Router 8, patching critical audit vulnerabilities and writing custom Vite build plugins.
- **Cross-Functional Impact:** Architected Node.js backend services and debugged the Python/FastAPI ecosystem to resolve critical integration bottlenecks.

EXPERIENCE

Lead Full Stack Engineer

Aug 2023 – Present

IO DataLabs Pvt Ltd

The Hive Ecosystem (Mortgage Origination Platform)

- **Enterprise Frontend Architecture:** Designed and built a multi-portal ecosystem (Loan Officer Portal, Borrower Portal, Escrow Portal) from scratch using React, TypeScript, and Vite. Served as the central hub for JMJ's core mortgage operations.
- **Cross-Stack Integration (Python/FastAPI):** Collaborated intimately on the core Python/FastAPI backend—a complex bidirectional sync engine connected to Ellie Mae's Encompass. Actively debugged, optimized, and shipped backend fixes to ensure uninterrupted data flow and resolve critical edge cases.
- **Interactive Domain Modeling:** Engineered a CLI-style onboarding wizard with robust route protection. Implemented dynamic, rules-based forms for financial data, seamlessly parsing borrower inputs into the relational PostgreSQL domain graph.

IO-Forms (Dynamic Form Builder SaaS)

- **Full-Stack Product Development:** Architected and developed a full-stack form builder application from the ground up for creating, managing, and publishing dynamic forms.
- **Modern Tech Stack:** Built a highly interactive, drag-and-drop user interface using Next.js and React, integrated tightly with a high-performance Python/FastAPI backend for data processing and form submission routing.

Phoenix-PM (Internal Project Management Platform)

- **End-to-End Architecture:** Architected and developed a modern, high-performance internal project management application from scratch to streamline company workflows, owning the entire stack from database schema to UI.
- **Backend Engineering (Node.js):** Built a robust RESTful API using Node.js, Express, and TypeScript. Implemented Prisma ORM for type-safe database interactions and managed the PostgreSQL relational database schema.
- **Frontend & DevOps:** Developed a dynamic, responsive client using React, Vite, Tailwind CSS, and Zustand. Containerized backend services using Docker and established a comprehensive test suite using Jest.

IO Website (Marketing & SEO)

- **3D Web Development (Next.js):** Built a highly visual, performant marketing website using Next.js 16, Three.js (react-three-fiber), and Framer Motion, showcasing advanced 3D rendering and micro-animations.

Design Engineer

2017 – Aug 2023

Ddesigners Cad Cam, Indore

- Applied deep technical problem-solving skills and adapted to highly technical workflows in a CAD/CAM environment prior to transitioning into full-stack software architecture.

CORE COMPETENCIES

- **Frontend:** React, Next.js, TypeScript, Vite, Tailwind CSS, Zustand, React Query, Three.js, Framer Motion.
- **Backend:** Node.js, Express, Python, FastAPI, REST APIs.
- **Databases & ORM:** PostgreSQL, Prisma ORM, SQLAlchemy, Alembic.
- **Architecture:** Microservices, Docker, Git, Jest, Encompass.

EDUCATION

B.Tech in Mechanical Engineering

RGPV, Bhopal

Vindhya Institute of Technology and Science, Indore

Graduated: 2017
